EXPERIENCE

Adobe Premiere Pro (*1 year experience*)

Adobe Photoshop (*1 year experience*)

Created personal projects with Blender

Designed responsive website using HTML, CSS
and basic Javascript

Built simple java project

It support service, Networking

Data entry operator (part-Time)

About Me

I am a creative, hardworking, and adaptable individual with a passion for technology and innovation. I excel in problem-solving and thrive in environments that challenge me to grow and deliver results.

With strong knowledge in hardware, networking, cybersecurity, and digital marketing, along with proficiency in Blender, Photoshop, Premiere Pro, and bilingual communication skills, I'm confident in contributing to tech-related fields.

My technical foundation (including CCNA basics, system assembly, and troubleshooting), combined with a growth mindset and eagerness to learn, allows me to work both independently and collaboratively to add value to any organization.

Working with graphics and cybersecurity in the computer sector is one of my greatest passions. I enjoy learning new things every day, especially exploring and practicing advanced and modern topics in graphic design and cybersecurity.
